

REFLEXIVE TESTING

The following is a list of reflexive tests which the Ochsner Department of Pathology and Laboratory Medicine (South Louisiana) will perform if the original test ordered meets the reflexive criteria. The reflexive testing will automatically be added on to the original order and will result in additional charges for the reflexive tests performed.

TEST	TEST DESCRIPTION	INITIAL RESULT	REFLEXES	TEST DESCRIPTION
ANA	ANA Screen	Positive	ANAT SMRNP SM SSA SSB DSDNA	ANA Titer SM/RNP Antibody SM Antibody SSA Antibody SSB Antibody Anti DNA Antibody
HGBNS	Hemoglobin Electrophoresis, Newborn Screen	New Variant or change from prior if indicated	HGELA	Acid Hemoglobin Electrophoresis
HGBEL	Hemoglobin Electrophoresis- Alkaline	New Variant or change from prior if indicated	HGELA	Acid Hemoglobin Electrophoresis
HBSAG	Hepatitis B Surface Antigen	Reactive	HBSGC	Hepatitis B Surface Ag Confirmation
HIVRP	Rapid HIV (for sites that perform)	Positive	HIV12	HIV 1/2 Ag/Ab
HIV12	HIV 1/2 Ag/Ab	Reactive	HIVSA	HIV 1/2 Supplemental Assay
TSH	TSH	Abnormal value	FT4	Free T4
UAR	Urinalysis with Reflex to Culture	WBC result >10	CXURN	Urine Culture
UMAC	Urine Macroscopic	Appearance=CLOUDY Urine Leukocyte Esterase - Trace, 1+,2+, or 3+ Urine Nitrites-Positive Urine Protein-1+,2+, or 3+ Urine Blood-1+, 2+, or 3+ Urine Glucose-3+ or 4+ Patient from 0-4 yrs old	UMIC	Urine Microscopic

REFLEXIVE TESTING

The following is a list of reflexive tests which the Ochsner Department of Pathology and Laboratory Medicine (South Louisiana) will perform if the original test ordered meets the reflexive criteria. The reflexive testing will automatically be added on to the original order and will result in additional charges for the reflexive tests performed.

TEST	TEST DESCRIPTION	INITIAL RESULT	REFLEXES	TEST DESCRIPTION
SPE	Protein Electrophoresis, Serum	New positive M protein	IFE	Immunofixation, Serum
UPE	Protein Electrophoresis, Timed Urine	New positive M protein	UIFE	Immunofixation, Urine, Timed
UPER	Protein Electrophoresis, Random Urine	New positive M protein	URIFE	Immunofixation, Urine Random
SYPH	Treponema Pallidum Antibodies	Reactive	RPR	RPR and Titer, if RPR is negative, reflex to Treponema pallidum particle agglutination test *See Appendix
CBCWD, RBCD	CBC with Manual Diff	Certain Abnormal WBC, Abnormal RBC or Abnormal Platelet values/flags generated by the instrument. *See Appendix	MDIF	Manually Performed Differential
CBCWD, RCBDC	CBC with Manual Diff	Certain CBC abnormal values or added by tech *See Appendix	REVOC	Pathologist Review of peripheral smear
HCVAB	Hepatitis C Antibody (ED Gilead samples only)	Reactive	HCVQN	Hepatitis C RNA, Quantitative, PCR
CDIF	Clostridium difficile	Toxin Negative and GDH Positive Or Toxin Positive and GDH negative	CDPCR	Clostridium difficile by PCR

REFLEXIVE TESTING

The following is a list of reflexive tests which the Ochsner Department of Pathology and Laboratory Medicine (South Louisiana) will perform if the original test ordered meets the reflexive criteria. The reflexive testing will automatically be added on to the original order and will result in additional charges for the reflexive tests performed.

CXAER CXBF CSBLD CXCSF CXGEN CXGRB CXRES CXTIS	Cultures – Multiple Body Source	Selected Pathogenic Organisms		Antibiotic Sensitivity
